

Milestone 2 Deliverables:

Learning Gaps: Java [Completed]

We are expected to learn and get hands-on developing using Java.

1. Java Fundamentals, Working with Primitives, Control Statements.
2. Working with classes & Objects, constructors, static members, methods.
3. Object Oriented Programming Features, Exception Handling

Design thinking & architecture of the capstone project [In-Progress]

We are expected to understand the functional requirements of the application and design the data models, front-end UI wireframes and back-end web services.

Learning & Hands-on Back-end development using Spring, Spring Boot [In-Progress]

We are expected to learn and get hands-on developing back-end APIS (RESTful Webservices) by working on the capstone project which cover Spring, Spring Boot.
