

Milestone 1 Deliverables:

#1 - Learning & Hands-on Front-end development using HTML5, CSS3, Bootstrap, JavaScript & Angular [Completed]

We are expected to learn and get hands-on developing a front-end application by working on the given assignments which cover HTML5, CSS3, JavaScript and Angular technologies. We will mostly use this time to cover our learning gaps on deferent technologies.

#2 - Learning & Hands-on Back-end development using Spring, Spring Boot & Microservices [In-Progress]

We are expected to learn and get hands-on developing back-end APIS (RESTful Webservices) by working on the given assignments which cover Spring, Spring Boot, and Spring Cloud Microservices

#3 - Design thinking & architecture of the capstone project [In-Progress]

We are expected to understand the functional requirements of the application and design the data models, front-end UI wireframes and back-end web services
